Note that the time indications **ataaseq**, **arfineq** and **aqqaneq** must stand as the singular form, while the rest of the forms must be as plural.

This means that fx '-mut' to be used in the derivation of terminalis of these forms, while the rest of the forms need terminalis plural '-nut'.

For example aqqanermut (at am./pm. 11) and pingasunut (at am./pm. 3).

Am./pm. 05.30 states *arfer**nup** qeqqa* and am./pm. 02.30 states *pinga**sut** qeqqa* (not pingasup qeqqa *).
